Information

INTRODUCTION

Sauer-Danfoss a world leader in hydraulic power systems has developed a family of axial piston motors.

DESCRIPTION

Sauer-Danfoss axial pistons fixed displacement motors are of swash plate design with preset displacement suitable for hydrostatic transmissions with closed loop circuit.

The output speed is proportional to the motor's input flow.

The output torque is proportional to the differential pressure applied to the main pressure ports.

The direction of motor (output) shaft rotation depends on flow input to the main pressure ports.

Sauer-Danfoss axial piston fixed displacement motors are well engineered and easy to handle.

The full-length shaft with a highly efficient tapered roller bearing arrangement offers a high loading capacity for external radial forces.

High case pressures can be achieved without leakage even at the lowest temperatures by using suitable shaft seals.

Sauer-Danfoss axial piston units are designed for easy servicing. Complete dismantling and reassembly can be carried out with standard hand tools, and all components or sub-assemblies are replaceable.

Axial piston fixed displacement motors of the Sauer-Danfoss pattern are made by licensed producers worldwide, providing consistent service and fully inter-changeable parts.

AXIAL PISTON FIXED DISPLACEMENT MOTOR

P005 118E

PUMP AND MOTOR CIRCUIT DESCRIPTION

P000 027E

Above figure shows schematically the function of a hydrostatic transmission using an axial piston variable displacement pump and a fixed displacement motor.

MOTOR CIRCUIT SCHEMATIC

P000 034

Designation:

- 1 = Fixed displacement motor
- 2 = Purge relief valve
- 3 = Shuttle valve
- 4 = High pressure relief valve

Ports:

- A, B = Main pressure ports (working loop)
- L₁, L₂ = Drain ports
- M_A = Gauge port for port **A**
- M_B = Gauge port for port **B**
- M = Gauge port - charge pressure

TECHNICAL PARAMETERS **Design**

Axial piston motor with fixed displacement and swash plate design.

Type of mounting

SAE four bolt flanges.

Pipe connections

Main pressure ports: SAE split flange

Remaining ports: SAE O-ring boss

Direction of rotation and flow

Clockwise or counterclockwise (viewing from the output shaft).

Direction of rotation	Port A	Port B
Clockwise (R)	Output	Input
Counterclockwise (L)	Input	Output

Installation position

Optional; motor housing must be always filled with hydraulic fluid.

External drain fluid loss

P005 105E

HYDRAULIC PARAMETERS

System pressure range, input p_1

Pressure on port A or B:

Max. operating pressure $\Delta p = 420 \text{ bar [6092 psi]}$

Max. high pressure setting $\Delta p = 460 \text{ bar}^1 \text{ [6672 psi]}$

¹only with POR-valve

System pressure range, output p_2

Normal setting for configuration MS and MR: 11.0 - 12.5 bar [160 - 181 psi] above case pressure.

Minimum: 8 bar, intermittent only

Case pressure

Max. rated pressure = 2.5 bar [36.3 psi]

Intermittent = 5.0 bar [72.5 psi]

Hydraulic fluid

Refer to Sauer-Danfoss publication *Hydraulic Fluids and Lubricants* and *Experience with Bio Fluids* for biodegradable hydraulic fluids.

Hydraulic fluid temperature range

$\vartheta_{\min} = -40 \text{ °C [-40 °F]}$

$\vartheta_{\max} = 95 \text{ °C [203 °F]}$

Viscosity range

$v_{\min} = 7 \text{ mm}^2/\text{s [49 SUS*]}$

$v_{\max} = 1000 \text{ mm}^2/\text{s [4630 SUS*]}$ (intermittent cold start)

Recommended viscosity range: 12 - 60 $\text{mm}^2/\text{s [66 - 278 SUS*]}$

*SUS (Saybolt Universal Second)

Filtration

Required cleanliness level: ISO 4406-1999 Code 22/18/13 or better.

Refer to Sauer-Danfoss publication *Hydraulic Fluids and Lubricants* and *Design Guideline for Hydraulic Fluid Cleanliness*.

Shaft load

The pump will accept radial and axial loads on its shaft, the maximum capacity being determined by direction and point of application of the load.

Please contact your Sauer-Danfoss representative.

Sauer-Danfoss Mobile Power and Control Systems – Market Leaders Worldwide

Sauer-Danfoss is a comprehensive supplier providing complete systems to the global mobile market.

Sauer-Danfoss serves markets such as agriculture, construction, road building, material handling, municipal, forestry, turf care, and many others.

We offer our customers optimum solutions for their needs and develop new products and systems in close cooperation and partnership with them.

Sauer-Danfoss specializes in integrating a full range of system components to provide vehicle designers with the most advanced total system design.

Sauer-Danfoss provides comprehensive worldwide service for its products through an extensive network of Authorized Service Centers strategically located in all parts of the world.
